| THE REPLY FILED 06 March 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.  |                               |   |      |  |  |  |
| PERIOD FOR REPLY [check either a) or b)]   |                               |   |      |  |  |  |
| a) The period for reply expires 3 months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).  Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |                               |   |      |  |  |  |

Continuation Sh et (PTO-303) 09/660,195

Continuation of 2. NOTE: The amendments to independent claims 1 and 16 recite new features of the invention which were not previously claimed, searched, or considered in the examination of the application. In particular, the recitation drawn to the fluid sensor introduces new structural limitations of the sensor, including a fluid passage within the sensor wherein the internal diameter of the fluid passage within the sensor is the same size as the blood passage within the cartridge. Since applicant bases the patentability of his device on the size of the passage within the pressure sensor, the limitations drawn to the size of the passage require further consideration.
